

# Do Web Genius websites rank higher on Google?

A competitive comparative research, comparing the Google rankings of randomly selected Web Genius websites, with randomly selected non-Web Genius websites in New Zealand.

July 2020

Researcher: Karline de Boer

## Abstract

Research Services Ltd, has performed an independent competitive comparative research and analysis of Web Genius websites in local business sectors around New Zealand.

The aim of this research was to assess if Web Genius websites continue to rank higher on Google than randomly selected non-Web Genius websites, in local business sectors around New Zealand. Also briefly highlight any change in data from research results in 2013.

As in the 2013 research, Web Genius provided the list of 10 business sectors and Web Genius websites to commence this research. In total 110 Web Genius websites. These websites represent their "Dominator" websites. The Dominator is their flagship website product that includes search engine optimisation for Google rankings.

Research Services has used the same methods as in 2013, to perform this research:

- Using [www.random.org](http://www.random.org), randomly select 2 Web Genius websites from each of the 10 business sectors.
- Research [www.yellow.co.nz](http://www.yellow.co.nz) for the non-Web Genius websites in the 10 business sectors ensuring they operated in the same region as the 2 Web Genius websites selected.
- A Rank Tracker was performed on 20 Web Genius websites and 20 non-Web Genius websites. Research of the 3 keyword phrases Web Genius provided, was used for each of these websites.
- The results from the Rank Tracker highlighted the visibility percentage of each website.

The average overall Google visibility for the Web Genius websites went up from 86.3% in 2013 to 87.1% in 2020, while the average visibility for the non-Web Genius websites went up from 21.9% to 23.5%. In both cases the Web Genius websites had almost four times the Google visibility of the non-Web Genius sites.

From the overall 40 websites selected, Web Genius websites in 2020, scored on average 63% higher than the non-web Genius websites, compared to 64% in 2013.

This 2020 Competitive Comparative Research continues to highlight that if you have a website prepared by Web Genius, there is a high probability that your website will be on the first page of Google with a very good chance of receiving a top share of the traffic for the keywords involved.

## Research findings

### Web Genius designed websites

Table 1 shows the Web Genius websites that Research Services randomly selected. To do this we used [www.random.org](http://www.random.org) to randomly select the website from the list provided by Web Genius. We also took note of the geographical region for each selection. These websites will be used as comparison with non-Web Genius websites.

**Note:** These are Web Genius's "Dominator" websites. The Dominator is their flagship website product that includes search engine optimisation for Google rankings.

**Table 1: Web Genius websites randomly selected (July 2020)**

Business sector	Random number selected	Web Genius Website	Region
Tree services	2	<a href="http://www.monkeymantrees.co.nz">www.monkeymantrees.co.nz</a>	Kapiti

## Non-Web Genius designed websites

Table 2 below displays the non-Web Genius websites that Research Services randomly selected using the websites listed in [www.yellow.co.nz](http://www.yellow.co.nz). Process:

1. Search on Yellow using the first keyword phrase along with the relevant geographical region i.e. Tree services Wellington.
2. Yellow displayed the total number of “Tree services” in Wellington and their details. To randomly select a business from this group we used [www.random.org](http://www.random.org) and entered in the total number of tree service businesses i.e. 47. Radom.org selected a number between 1 and 47 i.e. 23.
3. We then assessed the business listing on Yellow that coincided with the random number i.e. 23. We made sure the selected business had a website and offered the same services and performed their work in the same region as the Web Genius business. If it didn’t meet all our requirements, we continued to the listing directly after the selected one, and if this wasn’t valid then we continued to business directly before the selected one (then the one that is two after, then the one that is two before and so on until you find a valid comparison).

Observations whilst performing this research:

- More businesses, especially trades (i.e. plumber, painters) weren’t using a standard website page to promote their business. Instead they were using Facebook websites or other trade directory websites.
- It was noted several businesses didn’t promote their website through the Yellow directory. However, their website was located performing a google search.
- Yellow didn’t recognise keyword phrase “House Painter” when searching in smaller regions, therefore we used keyword “Painter” instead of House Painter for all the regions in this sector.

**Table 2: Non-Web Genius websites randomly selected (July 2020)**

Business Sector	total businesses	randomly selected number	Non Web Genius Website	Region

## Rank Tracker

Rank Tracker is third party software distributed by Link Assistant, an international search engine optimisation software company ([www.link-assistant.com/rank-tracker](http://www.link-assistant.com/rank-tracker)). The programme returns reports detailing a website's ranking in Google (and other search engines if desired) for a range of keyword phrases. It also calculates a Google Visibility Percentage to reflect a website's overall visibility in the top 30 Google results across the range of keyword phrases concerned. For example, if a website ranked number 1 for all keyword phrases being tested, it would have a visibility score of 100%. You can read more about how the Rank Tracker visibility score is calculated here: <https://www.link-assistant.com/support/index.php?/Knowledgebase/Article/View/83/5/what-does-the-visibility-column-in-rank-tracker-show>

The Rank Tracker software was performed on the randomly selected 20 Web Genius websites and 20 non-Web Genius websites, using the three keyword phrases. The Rank Tracker findings show the visibility percentage of non-Web Genius and Web Genius websites and where they are ranked on Google.

**Note:** Rank Tracker reports for each website are listed in Appendix A at the end of this Report.

Table 3 below shows the relative rankings of the Web Genius and non-Web Genius websites. As you will see the Web Genius websites significantly outperformed the non-Web Genius websites in search engine rankings on Google. For example, only two non-Web Genius website had a higher visibility % than a Web Genius website and only 3 other websites were anywhere close to a Web Genius website.

**Table 3: Rank Tracker Visibility % of non-Web Genius and Web Genius websites July 2020**

Business sector	Non-Web Genius websites	Vis %	Vis %	Web Genius websites

	www.theelectricalprofesional	10	78	www.taurangaelectrical.co.nz

In every case except two, the Web Genius websites have outperformed the non-Web Genius website it was compared with. In all cases, except for Tree services, Joinery, Upholsterer, Glazier, Concrete Contractor business sectors the differences are considerable.

Over the 40 websites the Web Genius websites scored on average 63% higher than the non-Web Genius websites. **Note:** 64% in 2013 and 70% in report prior to 2013.

Table 4 below displays the ranking of each website. Points to note:

- 45% of non-Web Genius websites did not appear in the first 50 search results on Google (using all 3 keyword phrases) and received a 0% visibility ranking. Compared to 50% in 2013.
- When performing Google searches using at least one of the keyword phrases, Web Genius websites appeared on the first page 53 out of 60 searches. Compared to 51/60 in 2013.

Whereas non-Web Genius websites appeared on the first page 11 out of 60 searches. Compared to 13/60 in 2013.

**Note:** Listings on the 1<sup>st</sup> page of a Google search displays 10 listings maximum (excluding Ads)

- Nine of the Web Genius websites ranked number 1 (with at least one of the keyword phrases) compared to 10 in 2013. Whilst 1 of the non-Web Genius websites ranked number 1 compared to 0 in 2013.

## Conclusion

The results from this 2020 research highlighted, with regard to the visibility percentage, there is a minor decrease in results for Web Genius designed websites from 2013. Whilst non-Web Genius websites have improved with one being ranked number one. However, even with non-Web Genius websites improving there is still a huge difference in the overall performance and visibility of these websites.

This 2020 Competitive Comparative Research continues to highlight that if you have a website designed by Web Genius, there is a high probability that your website will be on the first page of Google with a very good chance of receiving a top share of the traffic for the keywords involved.
